A Note to Our Readers

Welcome! This book was created with one goal in mind: to give your mind an enjoyable workout, one puzzle at a time. Inside, you will meet five cheerful friends — Heart, Stomach, Lung, Brain, and Kidney — who will guide you through four kinds of brain games: logic puzzles, path mazes, number puzzles, and pattern puzzles.

Each section starts gently and grows a little more challenging as you go. Take your time, use a pencil, and enjoy the feeling of your mind waking up a little more with every page. Answers for every puzzle are found in the back of the book.

About the Author

Alex Chen writes practical, friendly books designed to make everyday life a little easier and a little more joyful — from brain-healthy puzzle books to guides on productivity, finance, and simple living. Alex believes the best mental workouts are the ones that make you smile along the way.

Thank You!

If you enjoyed these puzzles, a short review on Amazon helps other readers discover this book — and means a great deal to an independent author. Thank you for spending this time with Heart, Stomach, Lung, Brain, and Kidney!

Keep Your Mind Moving

A few simple habits that pair well with regular puzzle time: a short daily walk, a glass of water within reach, a consistent sleep schedule, and staying in touch with friends and family. Small habits, repeated often, add up.

How These Puzzles Were Made

Every logic puzzle, maze, number puzzle, and pattern in this book was checked to make sure it has exactly one correct solution — no guessing required, just careful thinking. We hope that gives you the confidence to work through each page at your own pace.
